DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to the method of folding a workpiece, classified in class 493, subclass 267.
 - II. Claims 10-14, drawn to the apparatus for folding a workpiece, classified in class 493, subclass 231.
 - III. Claim 15, drawn to the subcombination of a solution dispensing system, classified in class 141.
 - IV. Claim 16, drawn to a transfer pump, classified in class?

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced by another different apparatus, such as, an apparatus that does not use guide rollers but rather uses conveying belts.
3. Inventions (I, II) and (III, IV) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed

does not require the particulars of the subcombination as claimed because the combination does not require the specific limitations in both subcombination groups III and IV. The subcombination has separate utility such as a dispensing system and transfer pump that are used in operations other than for a web folding and wetting operation, such as an operation dispenses adhesive onto a flap to fold the flap.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
